PROFESSIONAL SUMMARY

Senior Software & ML Systems Engineer with 4 years of experience building high-concurrency Python/FastAPI backends, optimizing relational database architectures, and deploying PyTorch & Scikit-learn inference microservices on Docker and AWS.

PROFESSIONAL EXPERIENCE

CloudScale Inc. — Senior Backend Engineer (2022 - Present)

- Designed, built, and maintained 15+ FastAPI microservices handling 25M daily requests with 99.99% uptime.
- Collaborated with data science teams to wrap PyTorch recommendation models into low-latency REST endpoints.
- Optimized complex PostgreSQL query execution plans, improving p99 database response times by 35%.
- Architected cloud infrastructure using Docker, AWS (EC2, S3, RDS), and Terraform.

FinTech Systems — Software Engineer (2020 - 2022)

- Developed financial transaction data pipelines in Python and SQL.
- Built fraud detection scoring jobs utilizing Scikit-learn, XGBoost, and Pandas.
- Automated container builds and continuous deployments using Docker and GitHub Actions.

EDUCATION

UC Berkeley — Bachelor of Science in Computer Engineering, 2016 - 2020 (GPA: 3.8/4.0)

TECHNICAL SKILLS

- Programming Languages: Python, SQL, JavaScript, Bash
- Frameworks: FastAPI, Django, Flask, Scikit-learn, PyTorch
- Databases: PostgreSQL, MySQL, Redis
- Tools & Cloud: Docker, AWS (EC2, S3, RDS), Git, Linux, Postman, CI/CD
- Soft Skills: Cross-functional Collaboration, System Architecture, Agile, Problem Solving

KEY PROJECTS

- Model Serving Gateway: High-throughput model serving gateway with Redis caching, reducing p99 inference latency to 28ms.
- Distributed Transaction Ledger: Resilient ledger service with idempotency keys in PostgreSQL.
