PROFESSIONAL SUMMARY

Data Scientist with 2.5 years of experience in predictive modeling, feature engineering, exploratory data analysis, and tabular machine learning using Python, SQL, Scikit-learn, and XGBoost.

PROFESSIONAL EXPERIENCE

RetailMetrics — Data Scientist (2022 - Present)

- Built customer churn and lifetime value predictive models using Python, Scikit-learn, and XGBoost with 0.84 ROC-AUC.
- Formulated complex SQL queries across BigQuery datasets to generate analytic feature tables.
- Designed and analyzed statistical A/B tests for marketing campaigns, increasing conversion by 12%.
- Communicated statistical model insights and visualizations to senior non-technical business stakeholders.

InsightCorp — Junior Data Analyst (2021 - 2022)

- Created automated Tableau dashboards and cleaned messy customer datasets using Pandas and NumPy.
- Maintained automated SQL reports and weekly data validation scripts.

EDUCATION

University of Washington — Bachelor of Science in Statistics & Applied Mathematics, 2017 - 2021 (GPA: 3.6/4.0)

TECHNICAL SKILLS

- Programming Languages: Python, SQL, R
- Frameworks: Scikit-learn, Pandas, NumPy, XGBoost, Matplotlib, Seaborn
- Databases: PostgreSQL, Google BigQuery
- AI/ML: Machine Learning, Statistical Analysis, Feature Selection, A/B Testing, Predictive Modeling
- Tools: Git, Jupyter Notebooks, Tableau
- Soft Skills: Analytical Thinking, Data Storytelling, Collaboration, Communication

KEY PROJECTS

- Churn Prediction Pipeline: End-to-end churn prediction notebook and monthly batch scoring job achieving 0.84 ROC-AUC.
- E-Commerce Price Elasticity Model: Formulated regression models to estimate product price sensitivity.
